

Marine Electrics

10 Week Basic Electrical Course

WOULD YOU KNOW WHAT TO DO IF ... ?

..... your GPS fails or your navigation lights and instruments stop working or you cannot start your engine because of starter motor or battery problems

If the answer to any of the above is NO, the Marine Electrics 10 Week Basic Electrical Course will give you, or your crew the knowledge and confidence to tackle electrical repairs on your boat.

The “Hands-on” course with the student includes battery banks and circuits, charging systems, alternators, starter motors, faultfinding and troubleshooting, use of voltmeter/multimeter, running repairs/get you home fixes, rigging emergency power, reading and understanding wiring diagrams.

The RNLI have reported an increase in callouts to boats with electrical problems, make sure YOU don't become one of the statistics

€385 including Course Notes

Next Class Commencing Monday, 25th January 2010

Venue: National Yacht Club, Dun Laoghaire

Time: 8:00pm - 10:15pm
